VIREZAA PAW & NOSE KEEPSAKE SET

Calm Paw Method Checklist

Keep this on the table on print day. Tick each box as you go.

Get ready (the day before)

- [ ] Read lessons 2, 3 and 4
- [ ] Pick a calm time: after a walk, a meal or a nap
- [ ] Ask a helper to join you

Set up (5 minutes)

- [ ] Firm table, or a hardcover book on the floor
- [ ] Treats, a damp cloth and a dry towel
- [ ] Clay kit open. Second clay pack still sealed
- [ ] Phone ready for a photo

The nose print (optional)

- [ ] Practice on scrap paper first
- [ ] Pat the nose dry. Dab ink very lightly
- [ ] Touch the sheet softly. Wipe the nose after

The clay print

- [ ] Knead the clay until soft
- [ ] Roll it smooth with the full roller
- [ ] Check the size against the frame
- [ ] Wipe the paw with the damp cloth
- [ ] Press with full weight, hold 1 to 2 seconds
- [ ] Lift straight up. Wipe the paw. Treat!
- [ ] Slipped? Re-roll right away, or open pack 2
- [ ] Add the name and date while soft

Drying and framing

- [ ] Dry flat, away from heat and sun
- [ ] No oven, microwave or hair dryer
- [ ] Flip it and press the edges each day
- [ ] Fully dry? Paint, then frame with the tape

The golden rule: Stop and try later if your pet seems stressed. A calm moment is worth more than a fast one. You have a second clay pack, so one wiggle is not the end.
